Project idea:

There is an ongoing crisis in Sudan forcing people to flee to other parts of the country or neighbouring countries. Our project aims at identifying the movement flows of displaced people. Some basic research questions answered by the dashboard could be the following:

- Where do people internally move?
- What can be seen regarding specific demographic parameters?
- Displacement camps (IDPs) locations and changes over time

Stakeholder group(s):

Stakeholder groups could be the United Nations itself. It could help different UN authorities and organs to support decision-making processes. --> find out what these people need, what are the characteristics of these persons? Create a "proto persona" (<https://openpracticelibrary.com/practice/proto-persona/>, <https://medium.com/@karimcmahon/proto-personas-vs-persona-s-db8873a2d2e4>)

Identified resources(s):

Center for Humanitarian Data OCHA (United Nations Office for the Coordination of Humanitarian Affairs)
